# MIDWAY'S UNDERGROUND LAKE (3)

Under the David Probst home, one block West of the town square there is an underground lake. The home is built over the lake. Some years ago while Reed Kohler was on the Midway Irrigation Board, they caused the canal to be cemented up in front of the David Probst property because there was access for the boys and girls of school to go far back under the layers of the earth which was dangerous and the irrigation company cemented the entrance closed. The house now stands on the pot rock formation.
